1145 – 1245 Hrs : Plenary Session 1 - Role of NEP 2020 in transforming Higher Education

The NEP aims to increase the gross enrolment ratio in higher education including vocational education from 26.3% (2018) to 50% by 2035. It envisages broad-based, multi-disciplinary and holistic under-graduation with flexible curriculum, creative combination of subjects and integration of vocational courses. This session will examine the pace of implementation of NEP in the last 2 years and what steps can be to transform higher education in the country and deliberate on the challenges being faced and the way forward to address these challenges.

1530 – 1630 hrs Plenary 4: Futuristic Pedagogies and practices for teaching, learning and assessment – Are they sustainable?

The Covid-19 pandemic has forced sudden transformation in teaching, learning and assessment practices. Educators from around the globe and at all levels experienced the necessity of rethinking their roles, the way they deliver learning and how they engage students in meaningful learning activities. Educators started exploring the use of technology along innovative pedagogical strategies which can have a significant impact on student motivation, persistence and skills' acquisition whether in an online or hybrid environment as well as the potential to present new ways to bridge theory and practice and get students to make sense of what they learn.

The session will deliberate on questions such as what sort of learning experiences should our learners be exposed to, in order to be able to thrive in the current scenario? How do we balance technology, pedagogy, assessment and the new normal?

What good examples of pedagogical and technological innovation are there and how these can be sustained? What should our pedagogical Framework for teaching, learning and assessment embrace? What support is required to transform teaching and learning?
